**ROBERT A. ROSE
PRIMARY EXAMINER
ART UNIT 323**

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Claims 1-24 are allowable over the art of record. The art of record shows polishing of wafers under substantially constant pressure and/or velocity. However, variations of pattern density on the wafer surface, changes in physical properties of the pad, changes in interface temperature, and changes in slurry supply or slurry temperature, can affect the frictional force and hence the polishing rate, even with substantially constant polishing pressure and/or velocity. None of the references of record disclose or suggest, either separately or in combination, a method of chemical mechanical polishing comprising pressing a substrate against a moving polishing surface with a controllable pressure, and controlling at least one of the pressure and velocity in response to a signal that depends upon the friction, to maintain a constant torque, frictional force, or coefficient of friction.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Rose whose telephone number is (571) 272-4494. The examiner can normally be reached on Monday through Thursday, and on alternate Fridays, from 8:00am-5:30pm.
